TECHNICAL SKILLS

Programming Languages: C++, Python, SQL

Data Science Analytics: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn, XGBoost, TensorFlow, Keras, PyTorch, LLM

Development: HTML, CSS, Flutter, Flask

Databases: MySQL

Cloud Platform: AWS

Documentation tools: Jira

Tools & Technologies: Streamlit, Jupyter Notebook, PowerBI

INTERNSHIP EXPERIENCE

Celebal Technologies

June 2025 – Aug 2025

Intern

- Completed a two-month Data Science internship at Celebal Technologies (June–August 2025), where I worked on real-world datasets involving data cleaning, exploratory analysis, and machine learning model development. I built and deployed predictive models using Streamlit, gaining practical experience in Python, ML algorithms, and interactive deployment.

Cognifyz Technologies

Jan 2025 – Feb 2025

Intern

- During my one-month remote internship at COGNIFYZ TECHNOLOGIES, I utilized my data science skills in Python to create detailed visualizations and develop prediction models based on provided datasets. This experience enhanced my technical abilities and contributed to the company's data driven decision-making..

PROJECTS

Heart Disease prediction model 🌐 GitHub

- Developed a machine learning-based prediction system to estimate heart disease risk using patient health data. Built models using scikit-learn/XGBoost and deployed an interactive interface with Streamlit. Utilized Pandas, NumPy, and joblib for efficient data preprocessing and real-time prediction.

Plant disease detection using CNN 🌐 GitHub

- Developed a deep learning web application to detect plant diseases from leaf images using a Convolutional Neural Network (CNN). Implemented using TensorFlow, Keras, and Flask for automated image-based disease classification..

Medical Image Analyzer 🌐 GitHub

- The Medical Image Analyzer is an AI-powered web application designed to assist in the analysis of medical images such as MRI scans, CT scans, and Chest X-rays. The system leverages advanced Deep Learning techniques and Convolutional Neural Networks (CNNs) to detect diseases and provide preliminary diagnostic insights.

ACHIEVEMENTS

- Winner of Codefiesta Hackathon 4.0 2025
- Winner of Digital Campus Google Cloud Hackathon 2024
- Winner of Udhbhav exhibition 2023
- Solved over 150+ problems on Leetcode 🌐 Leetcode

EDUCATION

Bachelor of Technology in Computer Science

Nov 2022 – Apr 2026

Poornima Institute of Engineering & Technology, Jaipur

CGPA: 8.82 / 10

Senior Secondary Education (XII)

2021 – 2022

Kendriya Vidyalaya Fort William

Percentage: 82.4 / 100

Matriculation (X)

2019 – 2020

Kendriya Vidyalaya Fort William

Percentage: 90.6 / 100
